

JUNE 2011 MEETING ANNOUNCEMENT

Wind Energy Resources in Ohio and Beyond

Douglas McIlvain, a Senior Project Manager for TetraTech, will provide an informative presentation on wind energy and resources, with an overview of the wind energy industry as well as insights into the available resources and current wind energy projects in progress in the State of Ohio. Mr. McIlvain will also discuss the benefits and challenges of Wind Energy and how they can be applied to maximize energy and resource savings.

- When:** **Wednesday, June 15th**
11:30-1:00 PM
- Where:** **KZF Design – 3rd Floor Conference Room**
700 Broadway Street
Cincinnati, OH 45202
- Format:** **11:30 to Noon – Lunch & Networking**
Noon to 1:00 - Program

Speaker Bio: Mr. McIlvain has over 17 years of professional experience in environmental consulting for public and private sector clients. In recent years Mr. McIlvain has focused his efforts on renewable energy development and support. He has managed wind energy and other energy-related projects in the region including a solar photovoltaic project for the Beightler Armory in Ohio, a waste-to-energy feasibility study for the Cincinnati Zoo, an Expert Avian and Bat Study for the Lake Erie Wind Power Project off the coast of Cleveland, and he is currently managing preliminary studies for 3 utility scale (100-200 MW) wind projects in Ohio, Indiana, and Michigan. In addition, Mr. McIlvain currently serves as one of the Renewable Energy Service Area leads for Tetra Tech in the Midwest.
