We will have a presentation by:
Joe Bosco, Account Executive
Mississippi Power
on
**Energy Conservation from a
Utility's Perspective**

The focus of this presentation is to acquaint the audience to a utility's view point on energy conservation. Utilities continue to seek ways to meet growing electricity demand and manage increasing energy costs while reducing the impact of electricity generation on the environment. Come and understand why increasingly, energy efficiency is viewed not as a social program, but as a resource.
